December 12, 2016

Dear Hamilton School Community:

Per my prior correspondence dated November 28, 2016, six drinking water outlets at the Shaner School tested above the lead action level (15 $\mu\text{g}/\text{l}$ [ppb]) established by the US Environmental Protection Agency for lead in drinking water. Two of the affected water fountains that were not accessible to students have been disconnected permanently and the remaining 4 fixtures have been replaced and retested.

The table below identifies the 4 drinking water outlets that tested above the lead action level and the results of the retest.

Location	Second Draw Result in $\mu\text{g}/\text{l}$ (ppb)
Fountain Room 105	64.0 ppb
Fountain Room 106	185.0 ppb
Fountain Room 107	94.0 ppb
Fountain Room 109	27.2 ppb

As the results indicate, our current remediation plan has not found success. Therefore, we will be installing individual water filters at each affected area. After the filters have been installed, an additional water test will be conducted.

For More Information

A copy of the test results is available in our central office for inspection by the public and can be viewed between the hours of 8:30 a.m. and 4:00 p.m. The results are also available on our website at www.hamiltonschools.org. For more information about the water quality in our schools, feel free to contact our Business Administrator, Anne-Marie Fala, at our Board of Education Office at 476-6302.

We will continue to keep you up to date on our remediation efforts.

Sincerely,

Frank Vogel,
Superintendent of Schools
